NEW CONTRACT AWARD

Spike Systems Awarded Contract by Spartan Construction for Traffic Control Enhancements

Phoenix, AZ - Spike Systems, a U.S. manufacturer specializing in vehicle access control and perimeter security, is proud to announce it has been awarded a new contract by Spartan Construction. Under the agreement, Spike Systems will supply its trusted and proven traffic control products, including Plate Barrier Gates (PBGs), CS72 and CS36 Tiger Teeth, and MicroDrive barrier operators, to support Spartan Construction's latest project.

Known for durability, innovation, and safety, Spike Systems' solutions are engineered to withstand high-volume use and harsh environments — delivering reliability where it matters most.

"We are thrilled to collaborate with Spartan Construction," said Jose Pineda, Director of Product Development & Operations, Spike Systems. "Our goal remains the same, to provide secure, dependable vehicle access solutions that help customers operate safely and efficiently."

This contract further strengthens Spike Systems' long-standing presence in the infrastructure and access control market, supporting customers across airports, rental car facilities, and commercial and government installations nationwide.

About Spike Systems

Spike Systems designs and manufactures high-performance traffic control products, all engineered and built in the United States. With nearly 20 years of proven expertise, the company continues to lead in safety, innovation, and reliability, helping secure critical access points for customers across multiple industries.
