Small Business | HUBZone (pending)

MADE IN U.S.A.

FEDERAL APPLICATIONS

- Military installations & controlled entry points
- Federal campuses & administrative facilities
- Ports of entry & inspection lanes
- Fleet operations & motor pools
- Transportation hubs & rental vehicle facilities
- Secure commercial & critical infrastructure sites

CERTIFICATIONS & COMPLIANCE

- UL Listed (ES41940)
- PU30-1 Crash Test Certified
- Designed for high-security & continuous-duty applications

WHY WORK WITH SPIKE SYSTEMS

Spike Systems helps federal facilities improve vehicle access security with reliable, crash-rated solutions designed for real-world operational demands, backed by responsive engineering support and long-term product performance.

CORE CAPABILITIES

- **Crash-rated** vehicle access control systems
- Active & passive **tire spike deterrent** systems
- Barrier gate manufacturing (Crash Barrier Gate & Plate Barrier Gate)
- **High-security traffic** control & perimeter protection solutions
- **Integration-ready** systems compatible with existing access control infrastructure
- **Continuous-duty** products designed for high-volume vehicle environments
