HOW IT WORKS

DEPLOYMENT (pictured)

1. Unlock the two front cam locks on both sides.
2. Place one hand on each handle.
3. Walk backward away from box to deploy.
4. Continue until the receiver tab passes through the slot.
5. Insert the cylinder lock through receiver tab.
6. Remove the key. The barrier is now locked and secure.

RETRACTION

1. Unlock and remove the cylinder lock.
2. Place hands on the handles and walk forward toward the box to retract.
3. The scissor assembly collapses and the spikes retract fully inside the housing.
4. Lock both front cam locks. The unit is now secured and out of the way.
